

1. Connect all the parts / lock the locks.
2. Always insert the rounded lock from the top into the straight one at the bottom (as demonstrated in picture 1).
3. Locks should all look the same from the front.
4. Pull the parts diagonally to lock all the locks properly and straighten the divider.
5. You can use the thread to measure the distance between the adhesive buttons before attaching them to the ceiling.
6. Measure, where you want to hang the divider and glue the buttons to the ceiling.
7. Assemble the fishing line with the S-hooks - 3x of exactly the same length.
8. Hang prepared divider on the hooks and adjust the fishing lines length if needed (to have the divider hanging straight).
9. If you are happy with the placement attach the adhesive buttons properly.
